

ANTI-SLIP DECKING CLEATS

Tough, weatherproof strips give existing wooden decking a slip resistant surface

Wooden decking and ramps can be hazardous in the wet or become slippery with algae in shady or damp conditions. Damp, slippery timber can be made safer instantly using **Anglo Anti-Slip Decking Cleats**.

- **Attractive finish**
- **Coarse grit surface for maximum slip resistance (not suitable for barefoot areas)**
- **Tough, 4mm thick GRP base**
- **Ideal for marinas, parks, balconies, patio areas**
- **Sizes available: 50mm, 90mm or 120mm wide**
- **Supplied in packs of 10 strips, all 1200mm or 2400mm long**
- **Available in Black or Stone**
- **Can be trimmed on site using a hacksaw if required**

PROFESSIONAL QUALITY

Anglo supplies specialist products for applications including: cleaning & preparation, surface treatment & coating, construction, repair & maintenance. Ask for details. The shades of certain colours may vary from product to product.
